Safety and Security Mirrors

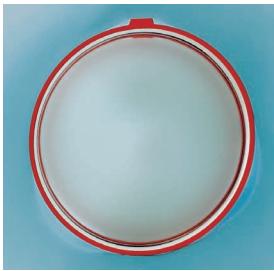

- Lightweight and easy to install
- Internal or external use
- Choice of shapes and sizes

Applications

- Retail premises
- Concealed entrances/exits and blind spots

Hemi View

Poly View

Traffic View

Visiguard convex mirrors are a cost-effective, simple solution to many surveillance problems. For internal or external use, they are versatile, easy to install, and can quickly eliminate blind corners and improve all-round surveillance.

Ideal for retail environments as an anti-theft device, Visiguard mirrors are also widely used in a range of settings as safety aids to reduce the risk of accidents.

Standard View and Opti View: supplied with tripod bracket (an optional extension arm is also available).

Flexi View: supplied with flexible fitting arm and fixing bracket. A slimview version is available (26"/660mm wide x 18"/457mm high).

Hemi View: quarter or half mirrors do not require a fixing kit; the full hemisphere version comes complete with fixing chains.

Poly View: an optional mounting kit is recommended.

Traffic View: supplied with a choice of wall mounting kit, adjustable bracket kit or post mounting kit.

Part No.	Type	Description

Practical Fitting Information for Visiguard Mirrors

1. Select the most suitable mirror from the range.
2. If you are trying to observe people: first measure distance (A + B) between observer and subject, then consult the 'Person' columns in the table to choose the most suitable mirror diameter.
3. If you wish to observe smaller objects, or more detail (for example, 10cm high text), again measure distance (A + B), then consult the 'Text' columns in the table to choose the most suitable mirror diameter.

A+B	Mirror Diameter			
	Ø16"/400mm		Ø24"/600mm	
	Person	Text	Person	Text
1m		✓		✓
2m		✓		✓
3m		✓		✓
